How they are formed:

**These are sand dunes in the Navib Desert.**

**These are sand dunes in the Sahara Desert.**

**This is a natural rock bridge in the desert of Utah, USA.**

**These limestone pillars are in the desert of Western Australia.**

Mesas are flat-topped mountains formed when the surrounding landscape is eroded.

This picture shows two natural arches.

This is a mushroom rock in the desert of Israel.

Can you see the mushroom rock in this picture?

Salt basins form when water evaporates and leaves the salt behind.

The salt in salt basins is collected and sold around the world.

Erosion has revealed the layers of different rock in the Painted Desert.

Natural rock pillars in the Sahara desert.

**Create a presentation about desert formations.**

*You will need to include text and images in your presentation, and you can include diagrams, maps and anything else you feel appropriate.*

Include each of these desert formations and describe them in as much detail as you can:

- ★ sand dunes
- ★ natural arches
- ★ rock bridges
- ★ salt basins
- ★ mushroom rocks
- ★ mesas
- ★ rock pillars

*Good luck!*
